

# Creation of search engines with the Shopware Administration

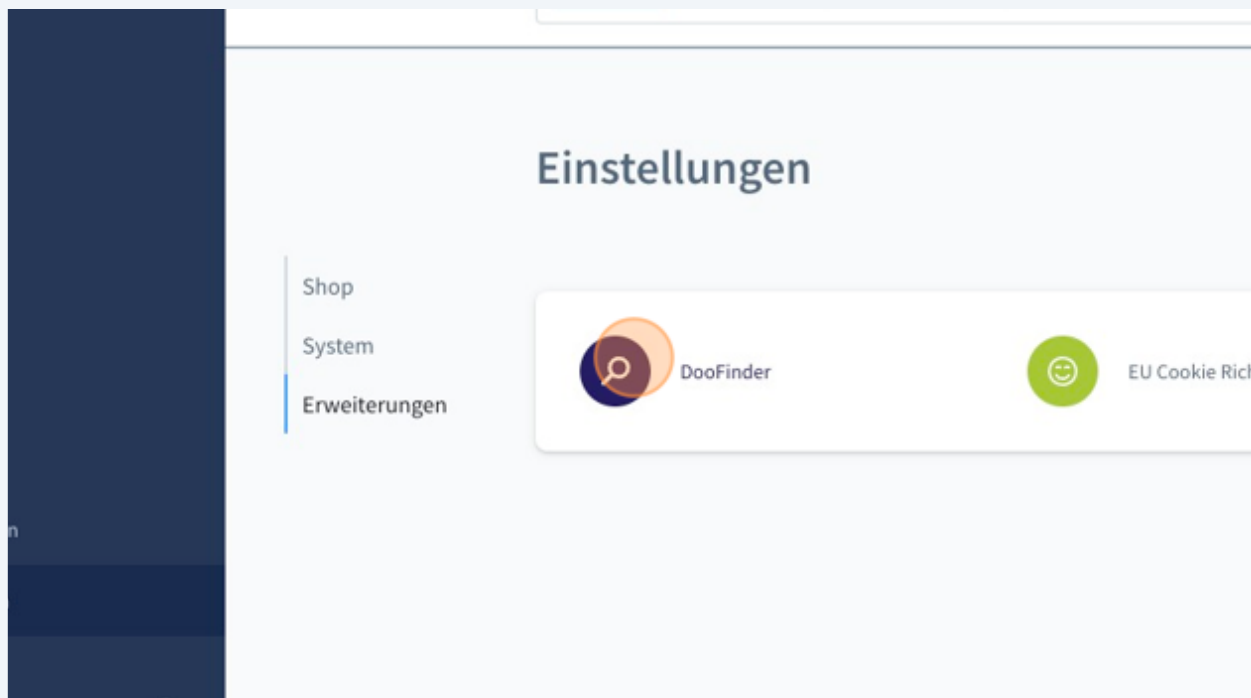

1 The first thing to do is go to the Shopware settings.

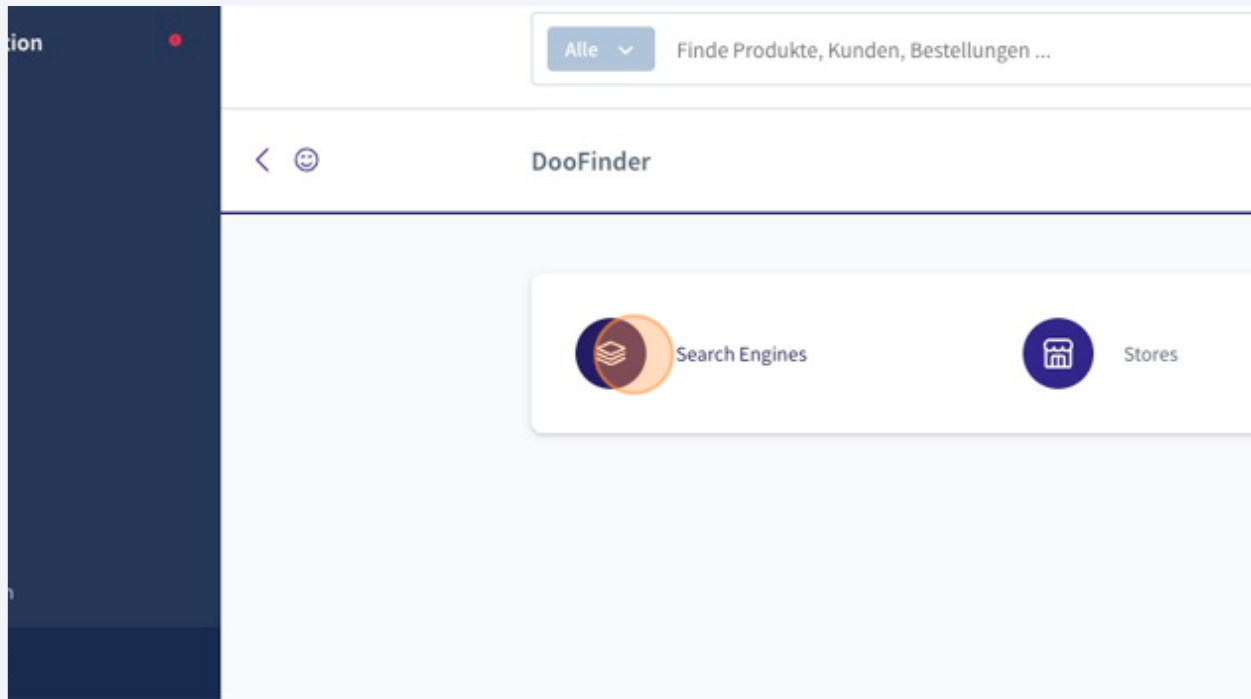

2 In the settings go to the extensions.

3 In the extensions, next go to the menu of DooFinder.

4 Here we go into the Search Engines option.

5

All the work now takes place under the Search Engines menu.  
All sales channels of the Shopware installation are listed.  
However, not the sales channels themselves but the assigned domains.

It is thus possible to connect several search engines for one sales channel with several languages.

	Search Engine	Engine HashId	Index Status	
				...
in Development			[api processing] - [produc	...
				...

6

If the right sales channel was selected in the previous step and the 3 dots were clicked, the search engine can now be created.

	Search Engine	Engine HashId	Index Status	
				...
			[api processing] - [produc	...
				...

Search Engine erstellen  
Search Engine Verknüpfen

7

Once you have completed the previous step, a window will appear in which you can select the Doofinder Store. The DooFinder Store manages and bundles all search engines for the storefront sales channel. Here you select the desired store and then click on "Create"

### Search Engine erstellen

Erstellen Sie für den von Ihnen ausgewählten Store eine Search Engine. Die Search Engine kann später nicht in einen anderen Store verschoben werden.

Doofinder Store

Abbrechen Erstellen

8

As soon as you get this success message, the search engine creation is successful. The initial processing of the data can take about 15 minutes.

The screenshot shows a web application interface. At the top, there is a search bar with the text "gen ..." and a magnifying glass icon. To the right of the search bar is a notification bell icon. Below the search bar is a table with columns "Search Engine" and "Engine Hashl". A success message overlay is displayed in the center of the table, reading "Erfolgreich" with a green checkmark icon and "Die Search Engine wurde erfolgreich erstellt." with a close button (X). Below the table, there is a row with the text "in Development" and "No SearchEngine found or".
